

Worksheet #29a

Teams

The word *team* refers to any group organized to work together. Let's take a look at a very simple team structure from the workplace.

This team is organized to work together to make a profit for the company. That is the goal. The reward is a paycheck.

Make a list of teams you have been part of at work; at school; and in your community, church, or family. Maybe you worked on a “team” to clean out the garage at home, plan a party, or complete a job.

Choose one team experience and draw a diagram in the space below of that team. (Look at the diagram of the workplace team for an example.)

Why was this team organized? What was the goal? What was the reward?
