

# Architects, Except Landscape & Naval

## On the Job

Architects design buildings and other structures. They make sure buildings are functional, safe, and economical. They draw plans of every part of a building, including the plumbing and electrical systems. They also help choose a building site and decide what materials to use. Most architects today use computers in their work, and many are self-employed.

## Subjects to Study

Math, English, drawing courses, drafting, computer science, shop and technology courses

## Discover More

What does your dream house look like? Using graph paper, draw a room-by-room floor plan of your ideal home. Include all the elements you would like—maybe a fireplace, an exercise room, a game room, or a spa. Don't forget the practical rooms—everyone needs a kitchen and a bath!
